Professional Summary

Full Stack Software Engineer with experience in developing scalable web applications using React, NodeJS, and Python. Proficient in designing and implementing REST APIs, with a strong focus on security, performance, and customer satisfaction.

Experience

Freelance Full Stack Developer

Oct 2023 - Present

Dubai and Kuwait

- Designed and deployed full-stack web applications for 6+ clients, improving operational efficiency and customer engagement
- Built and secured RESTful APIs with role-based access control, reducing unauthorized access incidents by 40%
- Engineered real-time chat systems with WebSockets and Redis, supporting 3,000+ concurrent users and cutting communication delays by 70%
- Automated deployments via CI/CD pipelines on Render and Vercel, reducing release cycles from days to hours
- Optimized application performance, achieving 25% faster load times and higher user retention rates

Education

Meru University of Science and Technology

Jan 2018 - Apr 2022

Bachelor's, Computer Security and Forensics

Kamuiru Boys High School, Kirinyaga

High School Certificate

Projects

SupportGeniousAI

Sep 2025 - Jan 2026

AI-Powered Customer Support SaaS

- Architected a real-time support platform enabling instant client-agent messaging, reducing ticket resolution time by 30%
- Integrated Redis + WebSockets to handle 5,000+ concurrent connections, lowering latency by 40% during peak usage
- Secured multi-role access with JWT authentication, ensuring 99.9% uptime and compliance with data protection standards
- Streamlined ticket lifecycle management, improving customer satisfaction scores by 25%
- Enhanced frontend state management with React Hooks & Context API, boosting developer productivity and reducing bugs by 20%

E-Commerce Fashion Marketplace

Mar 2025 - Jul 2025

Fashion Selling Store

- Delivered a full-stack e-commerce platform supporting Stripe, PayPal, and M-Pesa, enabling 100+ successful transactions with zero failures
- Designed a responsive UI with real-time feedback, increasing checkout completion rates by 35%
- Built scalable admin product management tools, reducing manual inventory updates by 50%
- Improved customer engagement through personalized recommendations, driving a 20% increase in repeat purchases

Trip Planner & Route Management System

SpotterAI

- Engineered a trip planning application with Leaflet.js and Fabric.js, enabling logistics teams to visualize routes more effectively and reducing planning time by 40%
- Enabled drivers to log and track routes (off-duty, sleeper berth, etc.), cutting reporting errors by 30%
- Built and automated CI/CD pipelines on Render and Vercel utilizing GitHub Actions, slashing release cycles from six days to under four hours and mitigating deployment failures by 15%

Customer Support Ticket System

- Integrated WebSockets for real-time chat, reducing communication delays by 80% and improving resolution speed
- Incorporated AviationStack API for flight data, enabling automated booking confirmations and reducing manual errors by 25%

Skills

Programming Languages: JavaScript, Python
Frontend: React, React-router, HTML, CSS
Backend: Django, Django Rest Framework, Restful API, NodeJS, NextJS
Databases: PostgreSQL, MySQL, Redis, MS SQL Server
DevOps & Tools: Docker, Git, GitHub, GCP, AWS, CI/CD, Render, Vercel
Testing and QA: Postman, Unit Testing, Pytest, Selenium

Authentication & Security: JWT, Session Auth, API Security

Integrations & APIs: Stripe Payments, Payment Systems, Twilio, Salesforce, Websockets, Socket Programming

Networking & Security: Nmap, Wireshark, Metasploit, Linux

Training & Certifications

- CS50 Web Programming with Python and JavaScript
- Cisco Networking Fundamentals
- Hack The Box Labs (Cybersecurity Training)

Languages

- English (fluent)
- Kiswahili (fluent)
