PROFESSIONAL SUMMARY

Full Stack Software Engineer with experience in developing scalable web applications using React, NodeJS, and Python. Proven track record of improving application performance, reducing latency, and enhancing customer satisfaction.

EXPERIENCE

Oct 2023 - Present

Dubai and Kuwait

- Designed and deployed full-stack web applications for 6+ clients, improving operational efficiency and customer engagement.
- Built and secured RESTful APIs with role-based access control, reducing unauthorized access incidents by 40%.
- Engineered real-time chat systems with WebSockets and Redis, supporting 3,000+ concurrent users and cutting communication delays by 70%.
- Automated deployments via CI/CD pipelines on Render and Vercel, reducing release cycles from days to hours.
- Optimized application performance, achieving 25% faster load times and higher user retention rates.

PROJECTS

SupportGeniousAI

Sep 2025 - Jan 2026

- Architected a real-time support platform enabling instant client-agent messaging, reducing ticket resolution time by 30%.
- Integrated Redis + WebSockets to handle 5,000+ concurrent connections, lowering latency by 40% during peak usage.
- Secured multi-role access with JWT authentication, ensuring 99.9% uptime and compliance with data protection standards.
- Streamlined ticket lifecycle management, improving customer satisfaction scores by 25%.

E-Commerce Fashion Marketplace

Mar 2025 - Jul 2025

- Delivered a full-stack e-commerce platform supporting Stripe, PayPal, and M-Pesa, enabling 100+ successful transactions with zero failures.
- Designed a responsive UI with real-time feedback, increasing checkout completion rates by 35%.
- Built scalable admin product management tools, reducing manual inventory updates by 50%.

Trip Planner & Route Management System

- Engineered a trip planning application with Leaflet.js and Fabric.js, enabling logistics teams to visualize routes more effectively and reducing planning time by 40%.
- Enabled drivers to log and track routes (off-duty, sleeper berth, etc.), cutting reporting errors by 30%.

Customer Support Ticket System

- Integrated WebSockets for real-time chat, reducing communication delays by 80% and improving resolution speed.
- Incorporated AviationStack API for flight data, enabling automated booking confirmations and reducing manual errors by 25%.

EDUCATION

Meru University of Science and Technology

Bachelor's, Computer Security and Forensics

Kamuiru Boys High School, Kirinyaga

Jan 2018 - Apr 2022
