Professional Summary

Full Stack Software Engineer specializing in Python (Django/DRF) and React, with hands-on experience delivering secure, scalable web applications and real-time systems. Spearheaded the development of REST APIs that decreased average response times by 35% and scaled to support 700+ additional daily requests. Designed and deployed solutions that supported 5,000+ concurrent users, reduced ticket resolution times by 30%, and accelerated deployment cycles across GCP, AWS, Vercel, and Render. Skilled in translating product requirements into engineering solutions that improved customer satisfaction, operational efficiency, and revenue growth.

Experience

Freelance Full Stack Developer

Oct 2023 - Present

Full Stack Software Engineer

Dubai and Kuwait

- Designed and deployed full-stack web applications for 6+ clients, improving operational efficiency and customer engagement.
- Built and secured RESTful APIs with role-based access control, reducing unauthorized access incidents by 40%.
- Engineered real-time chat systems with WebSockets and Redis, supporting 3,000+ concurrent users and cutting communication delays by 70%.
- Automated deployments via CI/CD pipelines on Render and Vercel, reducing release cycles from days to hours.
- Optimized application performance, achieving 25% faster load times and higher user retention rates.

Education

Meru University of Science and Technology

Bachelor's, Computer Security and Forensics

Meru, Kenya

Kamuiru Boys High School, Kirinyaga

Jan 2018 - Apr 2022

High School Certificate

Projects

SupportGeniousAI(AI-Powered Customer Support SaaS)

Sep 2025 - Jan 2026

Demo:<https://www.youtube.com/watch?v=xx-0H6b700I>

Multi-Tenant customer support platform

- Architected a real-time support platform enabling instant client-agent messaging, reducing ticket resolution time by 30%.
- Integrated Redis + WebSockets to handle 5,000+ concurrent connections, lowering latency by 40% during peak usage.
- Secured multi-role access with JWT authentication, ensuring 99.9% uptime and compliance with data protection standards.
- Streamlined ticket lifecycle management, improving customer satisfaction scores by 25%.
- Enhanced frontend state management with React Hooks & Context API, boosting developer productivity and reducing bugs by 20%.

E-Commerce Fashion Marketplace

Mar 2025 - Jul 2025

Fashion Selling Store

- Delivered a full-stack e-commerce platform supporting Stripe, PayPal, and M-Pesa, enabling 100+ successful transactions with zero failures.
- Designed a responsive UI with real-time feedback, increasing checkout completion rates by 35%.
- Built scalable admin product management tools, reducing manual inventory updates by 50%.
- Improved customer engagement through personalized recommendations, driving a 20% increase in repeat purchases.

Trip Planner & Route Management System

SpotterAI

- Engineered a trip planning application with Leaflet.js and Fabric.js, enabling logistics teams to visualize routes more effectively and reducing planning time by 40%.
- Enabled drivers to log and track routes (off-duty, sleeper berth, etc.), cutting reporting errors by 30%.
- Built and automated CI/CD pipelines on Render and Vercel utilizing GitHub Actions, slashing release cycles from six days to under four hours and mitigating deployment failures by 15%.

Customer Support Ticket System

- Integrated WebSockets for real-time chat, reducing communication delays by 80% and improving resolution speed.
- Incorporated AviationStack API for flight data, enabling automated booking confirmations and reducing manual errors by 25%.

Skills

- Programming Languages:** Python, JavaScript
- Frontend:** React, React-router, HTML, CSS
- Backend:** Django, Django Rest Framework, Restful API
- Databases:** PostgreSQL, MySQL, Redis

- **DevOps & Tools:** Docker, Git, GitHub, GCP, AWS, CI/CD
- **Testing and QA:** Postman, Unit Testing, Pytest, Selenium
- **Authentication & Security:** JWT, Session Auth, API Security
- **Integrations & APIs:** Stripe Payments, Payment Systems, Twilio, Salesforce, Websockets, Socket Programming
- **Networking & Security:** Nmap, Wireshark, Metasploit, Linux

Training & Certifications

- CS50 Web Programming with Python and JavaScript
- Cisco Networking Fundamentals
- Hack The Box Labs (Cybersecurity Training)

Languages

- English (fluent)
- Kiswahili (fluent)
