PROFESSIONAL SUMMARY

IT professional with experience in system administration, security, and full-stack development, skilled in Active Directory, Google Workspace, and IT security principles, with a strong background in computer security and forensics.

EXPERIENCE

Freelance Full Stack Developer

Oct 2023 - Present

| Dubai and Kuwait

- Designed and deployed full-stack web applications, improving operational efficiency and customer engagement.
- Built and secured RESTful APIs with role-based access control, reducing unauthorized access incidents.
- Engineered real-time chat systems with WebSockets and Redis, supporting concurrent users and cutting communication delays.

Full Stack Software Engineer

| Dubai and Kuwait

- Administered and maintained system infrastructure, ensuring reliability and security.
- Implemented and enforced password policies and security controls, including multi-factor authentication.
- Monitored system access and security logs, identifying and responding to potential security risks.

EDUCATION

Meru University of Science and Technology

Bachelor's, Computer Security and Forensics | Meru, Kenya

Kamuiru Boys High School, Kirinyaga

Jan 2018 - Apr 2022

High School Certificate

PROJECTS

SupportGeniousAI

Sep 2025 - Jan 2026

AI-Powered Customer Support SaaS

- Architected a real-time support platform, enabling instant client-agent messaging and reducing ticket resolution time.
- Integrated Redis + WebSockets to handle concurrent connections, lowering latency during peak usage.
- Secured multi-role access with JWT authentication, ensuring uptime and compliance with data protection standards.

E-Commerce Fashion Marketplace

Mar 2025 - Jul 2025

Fashion Selling Store

- Delivered a full-stack e-commerce platform, supporting multiple payment gateways and enabling successful transactions.
- Designed a responsive UI with real-time feedback, increasing checkout completion rates.
- Built scalable admin product management tools, reducing manual inventory updates.

Trip Planner & Route Management System

SpotterAI

- Engineered a trip planning application with Leaflet.js and Fabric.js, enabling logistics teams to visualize routes effectively.
- Enabled drivers to log and track routes, cutting reporting errors.
- Built and automated CI/CD pipelines on Render and Vercel, slashing release cycles and mitigating deployment failures.

Customer Support Ticket System

- Integrated WebSockets for real-time chat, reducing communication delays and improving resolution speed.
- Incorporated AviationStack API for flight data, enabling automated booking confirmations and reducing manual errors.

SKILLS

Programming Languages: Python, JavaScript

Frontend: React, React-router, HTML, CSS

Backend: Django, Django Rest Framework, Restful API

Databases: PostgreSQL, MySQL, Redis

DevOps & Tools: Docker, Git, GitHub, GCP, AWS, CI/CD

Testing and QA: Postman, Unit Testing, Pytest, Selenium

Authentication & Security: JWT, Session Auth, API Security, Active Directory, Google Workspace

Networking & Security: Nmap, Wireshark, Metasploit, Linux

TRAINING & CERTIFICATIONS

- CS50 Web Programming with Python and JavaScript
- Cisco Networking Fundamentals
- Hack The Box Labs (Cybersecurity Training)

LANGUAGES

- English (fluent)
- Kiswahili (fluent)
