PROFESSIONAL SUMMARY

IT professional with experience in system administration, security, and full-stack development, seeking to leverage my skills in Identity Access Management, Active Directory, and Google Workspace to ensure system reliability, user access security, and compliance with internal IT policies.

EXPERIENCE

Freelance Full Stack Developer

Oct 2023 - Present

Dubai and Kuwait | Dubai and Kuwait

- Designed and deployed secure full-stack web applications, improving operational efficiency and customer engagement.
- Built and secured RESTful APIs with role-based access control, reducing unauthorized access incidents.
- Engineered real-time chat systems with WebSockets and Redis, supporting concurrent users and cutting communication delays.

EDUCATION

Meru University of Science and Technology

Jan 2018 - Apr 2022

Bachelor's, Computer Security and Forensics | Meru, Kenya

Kamuiru Boys High School, Kirinyaga

High School Certificate

PROJECTS

SupportGeniousAI (AI-Powered Customer Support SaaS)

Sep 2025 - Jan 2026

- Architected a real-time support platform enabling instant client-agent messaging, reducing ticket resolution time.
- Integrated Redis + WebSockets to handle concurrent connections, lowering latency during peak usage.
- Secured multi-role access with JWT authentication, ensuring uptime and compliance with data protection standards.

E-Commerce Fashion Marketplace

Mar 2025 - Jul 2025

Fashion Selling Store

- Delivered a full-stack e-commerce platform supporting Stripe, PayPal, and M-Pesa, enabling successful transactions.
- Designed a responsive UI with real-time feedback, increasing checkout completion rates.
- Built scalable admin product management tools, reducing manual inventory updates.

Trip Planner & Route Management System

SpotterAI

- Engineered a trip planning application with Leaflet.js and Fabric.js, enabling logistics teams to visualize routes more effectively.
- Enabled drivers to log and track routes, cutting reporting errors.
- Built and automated CI/CD pipelines on Render and Vercel utilizing GitHub Actions, slashing release cycles.

Customer Support Ticket System

- Integrated WebSockets for real-time chat, reducing communication delays and improving resolution speed.
- Incorporated AviationStack API for flight data, enabling automated booking confirmations and reducing manual errors.

SKILLS

Programming Languages: Python, JavaScript

Frontend: React, React-router, HTML, CSS

Backend: Django, Django Rest Framework, Restful API

Databases: PostgreSQL, MySQL, Redis

DevOps & Tools: Docker, Git, GitHub, GCP, AWS, CI/CD

Testing and QA: Postman, Unit Testing, Pytest, Selenium

Authentication & Security: JWT, Session Auth, API Security, Active Directory, Google Workspace

Integrations & APIs: Stripe Payments, Payment Systems, Twilio, Salesforce, Websockets, Socket Programming

Networking & Security: Nmap, Wireshark, Metasploit, Linux

TRAINING & CERTIFICATIONS

- CS50 Web Programming with Python and JavaScript
- Cisco Networking Fundamentals
- Hack The Box Labs (Cybersecurity Training)

LANGUAGES

- English (fluent)
- Kiswahili (fluent)
