PROFESSIONAL SUMMARY

Cybersecurity enthusiast with a strong foundation in computer science and experience in full-stack development, seeking to leverage skills in security operations and threat analysis to protect enterprise environments.

EXPERIENCE

Freelance Full Stack Developer

Oct 2023 - Present

Dubai and Kuwait | Dubai and Kuwait

- Designed and deployed secure web applications, reducing unauthorized access incidents by 40%
- Built and secured RESTful APIs with role-based access control, improving operational efficiency
- Engineered real-time chat systems with WebSockets and Redis, supporting 3,000+ concurrent users and cutting communication delays by 70%
- Automated deployments via CI/CD pipelines on Render and Vercel, reducing release cycles from days to hours

EDUCATION

Meru University of Science and Technology

Bachelor's, Computer Security and Forensics | Meru, Kenya

Kamuiru Boys High School, Kirinyaga

Jan 2018 - Apr 2022

High School Certificate

PROJECTS

SupportGeniousAI

Sep 2025 - Jan 2026

AI-Powered Customer Support SaaS

- Architected a real-time support platform, reducing ticket resolution time by 30% and improving customer satisfaction scores by 25%
- Integrated Redis + WebSockets to handle 5,000+ concurrent connections, lowering latency by 40% during peak usage
- Secured multi-role access with JWT authentication, ensuring 99.9% uptime and compliance with data protection standards

E-Commerce Fashion Marketplace

Mar 2025 - Jul 2025

Fashion Selling Store

- Delivered a full-stack e-commerce platform, enabling 100+ successful transactions with zero failures
- Designed a responsive UI with real-time feedback, increasing checkout completion rates by 35%
- Built scalable admin product management tools, reducing manual inventory updates by 50%

Trip Planner & Route Management System

SpotterAI

- Engineered a trip planning application with Leaflet.js and Fabric.js, reducing planning time by 40%
- Enabled drivers to log and track routes, cutting reporting errors by 30%
- Built and automated CI/CD pipelines on Render and Vercel, slashing release cycles from six days to under four hours

Customer Support Ticket System

- Integrated WebSockets for real-time chat, reducing communication delays by 80% and improving resolution speed
- Incorporated AviationStack API for flight data, enabling automated booking confirmations and reducing manual errors by 25%

SKILLS

Programming Languages: Python, JavaScript

Frontend: React, React-router, HTML, CSS

Backend: Django, Django Rest Framework, Restful API

Databases: PostgreSQL, MySQL, Redis

DevOps & Tools: Docker, Git, GitHub, GCP, AWS, CI/CD

Testing and QA: Postman, Unit Testing, Pytest, Selenium

Authentication & Security: JWT, Session Auth, API Security

Networking & Security: Nmap, Wireshark, Metasploit, Linux

TRAINING & CERTIFICATIONS

- CS50 Web Programming with Python and JavaScript
- Cisco Networking Fundamentals
- Hack The Box Labs (Cybersecurity Training)

LANGUAGES

- English (fluent)
- Kiswahili (fluent)
