Professional Summary

Full Stack Software Engineer with experience in developing scalable web applications using JavaScript, React, and NodeJS. Proven track record of improving application performance, reducing latency, and enhancing customer satisfaction.

Experience

Freelance Full Stack Developer

Oct 2023 - Present

Dubai and Kuwait

- Designed and deployed full-stack web applications for 6+ clients, improving operational efficiency and customer engagement.
- Built and secured RESTful APIs with role-based access control, reducing unauthorized access incidents by 40%.
- Engineered real-time chat systems with WebSockets and Redis, supporting 3,000+ concurrent users and cutting communication delays by 70%.

Education

Meru University of Science and Technology

Jan 2018 - Apr 2022

Bachelor's, Computer Security and Forensics

Kamuiru Boys High School, Kirinyaga

High School Certificate

Projects

SupportGeniousAI

Sep 2025 - Jan 2026

AI-Powered Customer Support SaaS

- Architected a real-time support platform enabling instant client-agent messaging, reducing ticket resolution time by 30%.
- Integrated Redis + WebSockets to handle 5,000+ concurrent connections, lowering latency by 40% during peak usage.
- Secured multi-role access with JWT authentication, ensuring 99.9% uptime and compliance with data protection standards.

E-Commerce Fashion Marketplace

Mar 2025 - Jul 2025

Fashion Selling Store

- Delivered a full-stack e-commerce platform supporting Stripe, PayPal, and M-Pesa, enabling 100+ successful transactions with zero failures.
- Designed a responsive UI with real-time feedback, increasing checkout completion rates by 35%.

Trip Planner & Route Management System

SpotterAI

- Engineered a trip planning application with Leaflet.js and Fabric.js, enabling logistics teams to visualize routes more effectively and reducing planning time by 40%.
- Enabled drivers to log and track routes (off-duty, sleeper berth, etc.), cutting reporting errors by 30%.

Skills

Programming Languages: JavaScript, Python

Frontend: React, React-router, HTML, CSS

Backend: NodeJS, NextJS, Django, Django Rest Framework

Databases: PostgreSQL, MySQL, Redis

DevOps & Tools: Docker, Git, GitHub, GCP, AWS, CI/CD

Testing and QA: Postman, Unit Testing, Pytest, Selenium

Authentication & Security: JWT, Session Auth, API Security

Integrations & APIs: Stripe Payments, Payment Systems, Twilio, Salesforce, WebSockets, Socket Programming

Networking & Security: Nmap, Wireshark, Metasploit, Linux

Training & Certifications

- CS50 Web Programming with Python and JavaScript
- Cisco Networking Fundamentals
- Hack The Box Labs (Cybersecurity Training)

Languages

- English (fluent)
- Kiswahili (fluent)
