Professional Summary

Full Stack Software Engineer with experience in Python, React, and real-time systems, looking to leverage skills in AI and Voice Agents to drive business value.

Experience

Freelance Full Stack Developer Dubai and Kuwait	Oct 2023 - Present
- Designed and deployed full-stack web applications for 6+ clients, improving operational efficiency and customer engagement. - Built and secured RESTful APIs with role-based access control, reducing unauthorized access incidents by 40%. - Engineered real-time chat systems with WebSockets and Redis, supporting 3,000+ concurrent users and cutting communication delays by 70%.	

Education

Meru University of Science and Technology Bachelor's, Computer Security and Forensics	Jan 2018 - Apr 2022
Kamuiru Boys High School, Kirinyaga High School Certificate	Jan 2018 - Apr 2022

Projects

SupportGeniousAI(AI-Powered Customer Support SaaS) Multi-Tenant customer support platform	Sep 2025 - Jan 2026
- Architected a real-time support platform enabling instant client-agent messaging, reducing ticket resolution time by 30%. - Integrated Redis + WebSockets to handle 5,000+ concurrent connections, lowering latency by 40% during peak usage. - Secured multi-role access with JWT authentication, ensuring 99.9% uptime and compliance with data protection standards.	
E-Commerce Fashion Marketplace Fashion Selling Store	Mar 2025 - Jul 2025
- Delivered a full-stack e-commerce platform supporting Stripe, PayPal, and M-Pesa, enabling 100+ successful transactions with zero failures. - Designed a responsive UI with real-time feedback, increasing checkout completion rates by 35%.	
Trip Planner & Route Management System SpotterAI	
- Engineered a trip planning application with Leaflet.js and Fabric.js, enabling logistics teams to visualize routes more effectively and reducing planning time by 40%. - Built and automated CI/CD pipelines on Render and Vercel utilizing GitHub Actions, slashing release cycles from six days to under four hours and mitigating deployment failures by 15%.	
Customer Support Ticket System	
- Integrated WebSockets for real-time chat, reducing communication delays by 80% and improving resolution speed. - Incorporated AviationStack API for flight data, enabling automated booking confirmations and reducing manual errors by 25%.	

Skills

Programming Languages: Python, JavaScript
Frontend: React, React-router, HTML, CSS
Backend: Django, Django Rest FrameWork, Restful API
Databases: PostgreSQL, MySQL, Redis
DevOps & Tools: Docker, Git, GitHub, GCP, AWS, CI/CD
Testing and QA: Postman, Unit Testing, Pytest, Selenium
Authentication & Security: JWT, Session Auth, API Security
Integrations & APIs: Stripe Payments, Payment Systems, Twilio, Salesforce, Websockets, Socket Programming
Networking & Security: Nmap, Wireshark, Metasploit, Linux
AI and Voice Agents: ASR, TTS, LLMs, Prompt Engineering

Training & Certifications

- CS50 Web Programming with Python and JavaScript
- Cisco Networking Fundamentals
- Hack The Box Labs (Cybersecurity Training)

Languages

- English (fluent)
- Kiswahili (fluent)
